Introducing  
YDF.ai by Cryptoloc

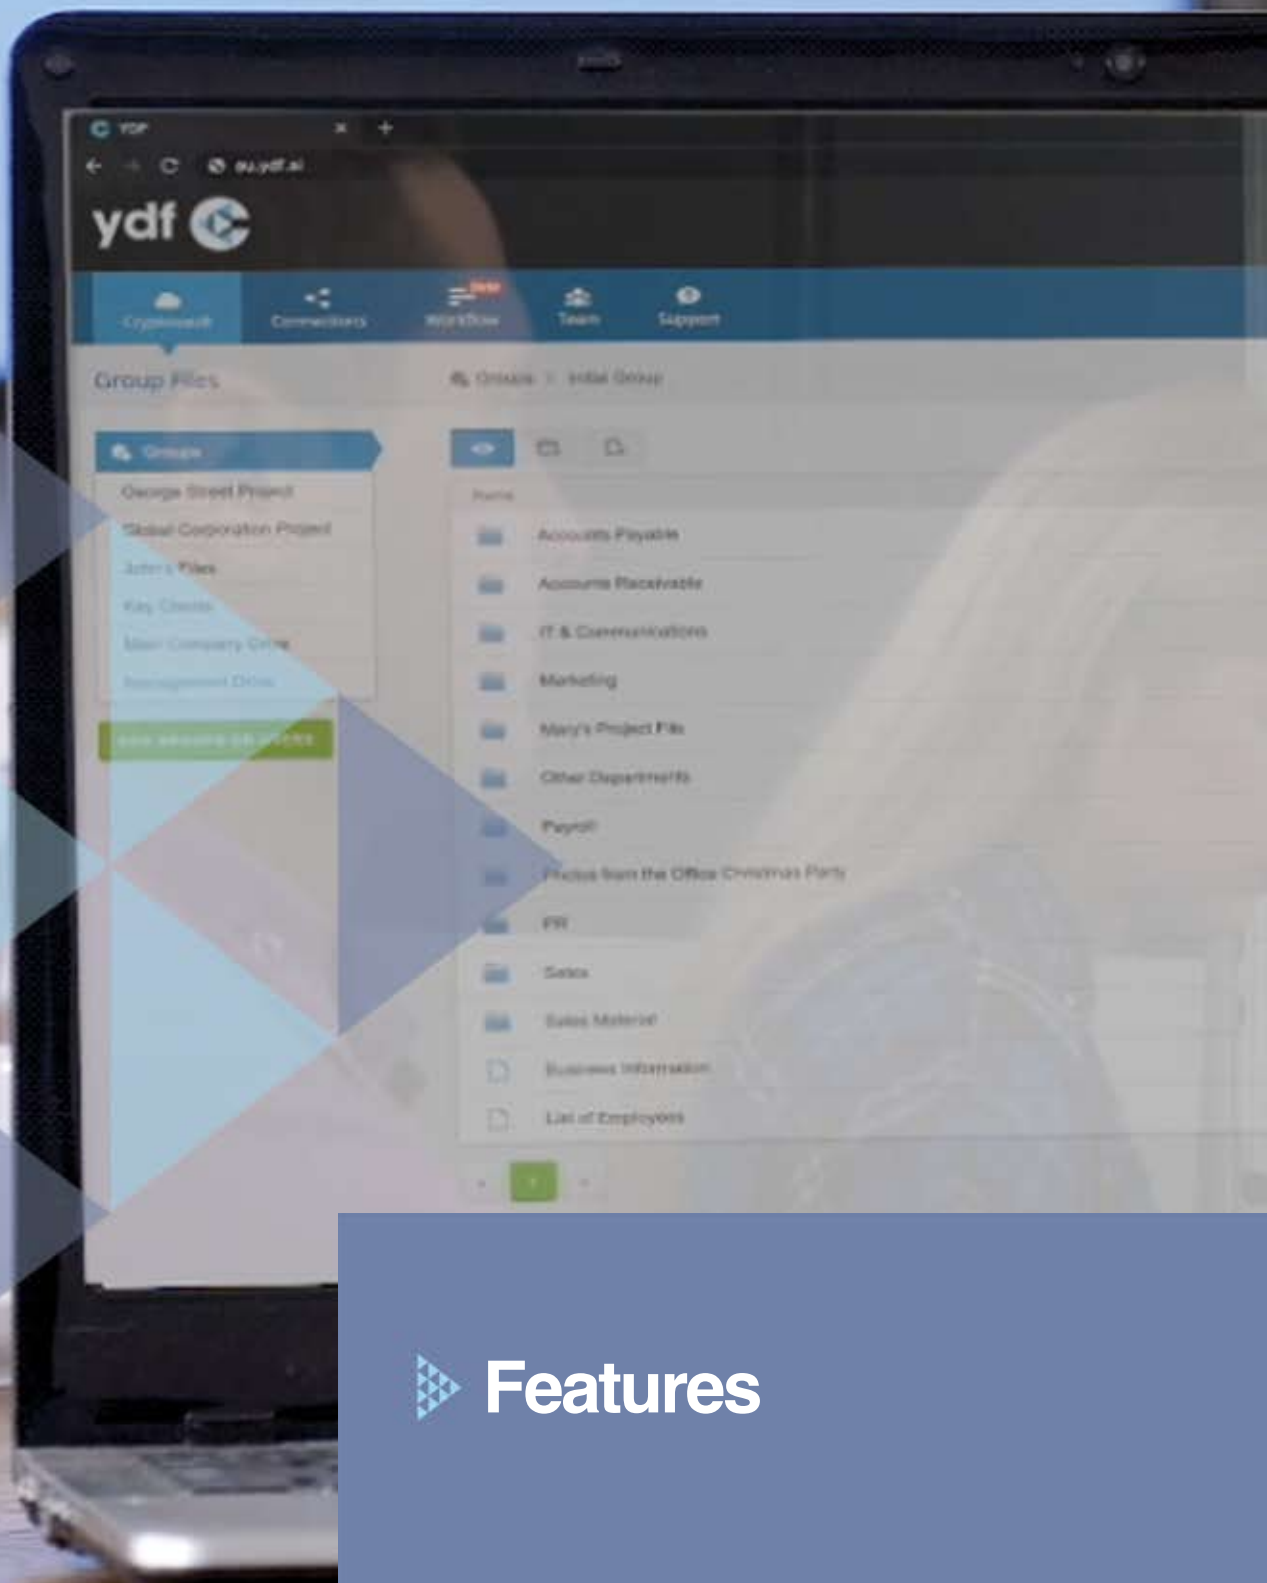

# The World's Most Secure Cloud File Storage Service

YDF.ai is Cryptoloc's new challenger app designed to change the way businesses and individuals see cybersecurity. It offers the same as other Cloud File Storage providers with the addition of Cryptoloc's world class, patented encryption technology.

Last year over 43% of cyber attacks targeted small businesses and with the average cost of a cyber attack running into hundreds of thousands, the effects to a small business can be devastating. YDF.ai is Cryptoloc's challenger app designed to change the way the world sees cybersecurity. For small businesses and individuals that need a highly secure place to store their files in the cloud, YDF.ai by Cryptoloc offers the perfect solution, for a small monthly fee with no commitments or contracts. YDF.ai allows you to upload files in the cloud using the web portal or one of our free iOS, Android, Windows or Mac applications. Once you upload your files they are automatically encrypted using Cryptoloc's patented encryption technology.

Additional features include the ability to create automated processes and workflows as well as providing a host of collaboration tools when working as a team. It allows Managers to define roles for their team and with our pay as you go SecureShare service (powered by Cryptoloc Secure 2 Client), you can send fully encrypted documents and request digital signatures straight from our free Microsoft Outlook Add-In. Businesses can get 1GB of storage space per user or purchase additional space if required. YDF for Business comes with a free 30 day trial and your own personal Business Account Manager, who can help setup your business on YDF.

**Get a 30 day FREE trial instantly:

## Features

# The Ultimate in Workplace Mobility

YDF.ai makes remote working easy thanks to a host of included extras that make workplace mobility a breeze. Use it on your computer, phone or tablet and decide which country you want to store your data in.

## **Workflows & Automations**

Automate your document handling processes with our Workflow Builder - a tool which allows you to map out a path on how you would like to handle a file, based on a specific set of rules and triggers.

## **Assign Roles**

Assign user roles and permissions so that your team can only access the files and folders that you want them to have access to.

## **Multiple Upload Methods**

Upload and access files using your browser or use one of our free apps for mobile/ tablet and Windows/ Mac. Fully synchronise your files with our free Sync app which lets you work seamlessly with YDF.

## **Storage Space**

You get 1GB per user as standard with our business plan, however further data allowances can be purchased anywhere from 1GB through to 10 TB.

## **Pay As You Go Document Signing**

YDF.ai allows you to send fully encrypted documents and request digital signatures straight from Microsoft Outlook with our free SecureShare add in available on Microsoft App Source. Request digital signatures for just \$1 USD per document and purchase top-up's as required. Pay only for the documents you send.

## **Free Business Setup**

Our business plan comes with free setup assistance from your dedicated onboarding specialist.

## ▶ Plans & Support

---

# Start With A Free Trial & Free Setup Assistance

YDF for Business comes with a 30 day free trial with no minimum commitments or contracts. Pay only a small monthly fee per user and get FREE setup help.

YDF.ai includes a FREE 30 day trial for business users. Once your trial has finished there are no monthly commitments and no contracts. You only pay a small monthly fee per user, plus a monthly fee for any additional data. Business users get free setup assistance from a dedicated Onboarding Specialist, who can help you and your business started on YDF. Your subscription also includes access to our training materials and support videos.

Once setup is complete you will be assigned a dedicated Account Manager who will be your first point of contact for any support you need. Pricing plans vary based on the location where you would like your data stored and how many users you have.
